## Welcome to Colb

We are blockchain experts with a solid foundation in law. Our clients include existing ventures, start-ups, established companies, institutions, and fintechs. Colb's specialists understand the complex blockchain environment for the global arena and employ a young, compelling technology to build strategic solutions. This is accomplished by combining onboard knowledge of regulatory, financial, marketing/communication and IT disciplines. Each client is unique, thus every solution is individually crafted, custom-tailored, and made-to-measure. Colb clients gain access to exceptional resources, team wisdom,

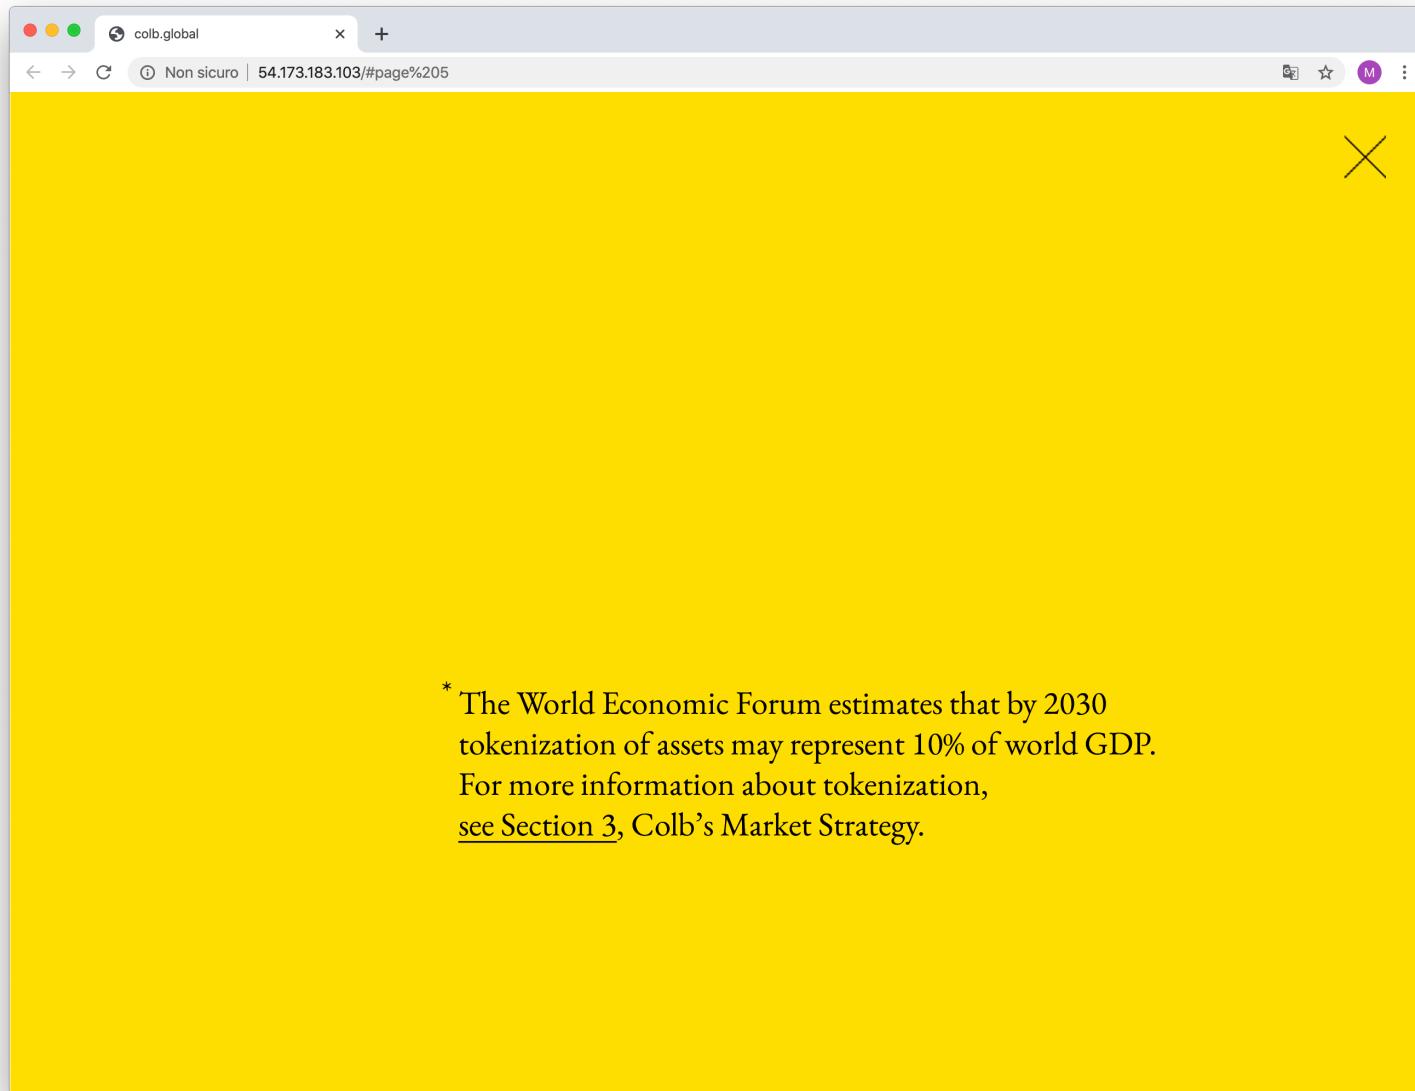

[Increase font size](#)

We believe that it is the responsibility of modern society to guarantee the greatest number of people abundance and comfort. Blockchain emerges as a positive alternative in an era of income concentration, the debate over the merits of growth, and the need for new methods to transform the monopolistic hold on global wealth. Blockchain has the power to offer innovative mechanisms to a greater number of participants. With blockchain, users can rely on a safe and transparent network which better addresses the problem of fallible intermediaries. Within the blockchain, individuals can exercise control over their own money and track every transaction with the confidence that each is validated algorithmically. The blockchain's utility has the potential to extend beyond the realm of finance. It can ensure greater confidence in the production chain. The process of commodities and assets tokenization\* will

- improve food source certification
- streamline distribution networks
- add leverage to the possibilities of investment and fractional ownership
